the issues

tasmanian wildlife matters

wildlife has the right to:

- live its own life unhindered
- respect
- be valued for itself

Millions of Tasmanian native animals are killed every year on our roads, in the name of recreational and commercial hunting, and because of conflicts with farming and forestry operations. Tasmanians are waging a war on native wildlife!

Learn about some fascinating native species, the threats they face from human actions in their daily lives, and how we can live in harmony with them.
