

## Facts and Fishes Part 2

---

As you listen to the podcast, answer the following questions:

1. In what ways do we interact with fish?

2. Dr. Dorey discusses the statistics of fishes killed every year in commercial fishing – how many does she estimate, and what is your reaction to this?

3. Identify some of the welfare issues that Dr. Dorey discusses in relation to how fishes are caught. How does this make you feel?

4. Identify the three main impacts fishing has on our environment.

## Facts and Fishes Part 2

---

5. In your own words, explain 'aquaculture'.

6. According to Dr. Dorey, what is the main problem with aquaculture in relation to fishes and the environment?

7. What do you think? Does our treatment of fish in commercial industries reflect what we know about them?
